# EV POLYMERIC SAND

## INSTALLATION INSTRUCTIONS

Since 1990

greatnorthhardscape.com

### High Quality Polymeric Sand At Competitive Prices

- State of the art manufacturing
- Smart polymer technology
- Precisely calibrated sand fines for decades of strength & performance
- One watering - since.... always!
- Highest documented post installation performance
- No need to stock several different formula's
- One sand, Every joint, Every job
- See through bags eliminate picking errors
- Water resistant bags

Available in Beige, Grey, White, Black & Charcoal (NEW!)

### Reminder

- We recommend using this product at temperatures over 32°F (0°C).
- Install the product only in good weather conditions. Rain showers immediately after the installation could carry the polymeric sand back to the paver surface. Cover it up!
- Make sure the pavers, slabs or stones are dry before you start spreading the sand to avoid sticking or staining. Furthermore, make sure that pavers are free of polymeric sand before spraying with water.
- Before using a sealer on your paved surface, we recommend to wait at least 20 days and check with the paver manufacturer to find out if it is safe to apply a sealer at this time.
- This product must be stored in a dry place.

### Installation Instructions

**STEP 1:** Pour the EV EVOLUTION polymeric sand on a completely dry surface.

**STEP 2:** Using a push broom, spread the polymeric sand over the joints, making sure to fill to the full depth of the paver, stone or slab (minimum 2" (6 cm) depth).

**STEP 3:** Use a vibrating plate over the entire area for joints less than 1/4". Repeat steps 1 to 3 until the joints are completely filled.

**STEP 4:** To avoid having the product sticking to the top of the pavers, stones or slabs, remove all the remaining sand with a fine bristle brush and a leaf blower.

**STEP 5 WATERING:** Use a water hose with a spray nozzle to water the area on shower setting (45 sec. per 50 sq. ft.) to avoid displacing the polymeric sand. We recommend doing a spot check to make sure the water has filtered through to a minimum of 1" (2,54 cm) of the depth of the joint. Simply scratch the sand with a screwdriver or sharp object to visualize, then pack-it back to the original condition. Do not over-water or flood, causing a runoff.

**STEP 6 DRYING/SETTING:** Allow at least 24 hours of drying time for a maximum stability and performance of this product before exposure to rain. Drying or hardening time will vary depending on weather conditions. Cold and damp temperatures will increase the drying time substantially.

# LET'S FINISH THE JOB - ASK US ABOUT

## Snap Edge® Commercial Paver Restraint

A centred nail boss with extra thick spike collar reinforced by a heavy triangular buttress and robust connector are the reasons Snap Edge® has the most reliable lateral support for almost 30 years. One piece eliminates the need for multiple SKU's which leaves you more inventory dollars. By recommending Snap Edge® you recommend the best. Lifetime Warranty.

## BARRIER Residential Paver & Landscaping Applications

- Flexible design can be used in straight lines, curves and tight bends
- Helps secure paver bricks & prevents pavers from moving horizontally
- Open Base design allows grass roots to help anchor edging in place
- Barrier™ is invisible after installation
- Creates permanent barrier between different landscape materials
- Perfect solution for building tree rings

## Pave Rollers VPR 450 / 700

## Compactors

## Stronghold Spikes

- 10" Steel Spikes
- 8" & 10" Nylon Spikes
- 8" Retail Packaged Steel Spikes

## Stronghold Foam Adhesive

- One Can = 6 x 28 oz. of regular adhesive
- 8 minute tack time
- Works in low temperature and on wet surfaces
- Time and money saver
- Gun Applicator and Cleaner available

## Paver Bond

- 28 years proven service
- Quick Curing
- High Strength
- Adheres to frozen and wet surfaces
- Freeze - Thaw stable

## BL Platinum

- Heavy Duty Premium Urethane Adhesive
- Completely flexible when cured
- Provides durability, safety and dependability for the most demanding applications
